

## Supply Chain Architecture Staff Specialist (f/m/div)\*

### Job description

Would you like to support and lead global supply chain projects as subject matter expert, and play a key role in implementation with focus on overarching supply chain processes? Then this is the right role for you. We look forward to your application!

In your new role you will:

- **Support and contribute towards the business analysis of new supply chain demands** with “overarching” processes that include **production scheduling, contract manufacturing, intercompany shipment** and **manufacturing integration topics**
- Based on the business analysis **define the supply chain concepts** in collaboration with supply chain and IT experts and architects
- **Support and lead global supply chain projects** as subject matter expert, and play a key role in implementation with **focus on overarching supply chain processes**
- **Drive and facilitate the discussions with business leaders** from corporate supply chain, frontend and backend OPC teams to identify business supply chain capabilities in relation to current and future business objectives based on the integrated supply chain roadmap
- **Collaborate with experts from IT and Factory Integration** on supply chain functional capability improvements to fulfill current and future business objectives
- **Drive and contribute to the continuous improvement initiative** towards improving the supply chain plan and make process KPIs on regular basis with collaboration with supply chain process owners and experts
- **Define supply chain plan** and **make solutions and capabilities** with understanding the touchpoints and interdependencies with production, procurement and finance controlling processes
- **Work on integration projects** to integrate and/or transition from legacy processes to target processes

### Profile

You have a clear notion of how innovation contributes to the commercial success of the company and concentrate your creativity and knowledge on producing results with real added value. You are able to quickly establish a successful cooperation and clarify areas of responsibility, coordinate your work with colleagues, and regularly share your insights with them. You feel responsible for and contribute to the team’s success and promote an awareness for quality in your area of work.

You are best equipped for this task if you have:
