

## Senior Manager Chip Technology Development for E-Mobility in Villach (f/m/div)\*

### Job description

You are a manager, a leader and curious about technical solutions? You want to work on the leading edge of the promising E-Mobility movement and take the technology development of our power devices to the next level? You like to keep the big picture and at the same time dive deeply into technical topics? We have the perfect opportunity for you! As Senior Manager for the Chip Technology Development Team in Villach you will lead a team that develops ideas to their full implementation in an international environment! Apply now to become part of Infineon Villach!

As Senior Manager you are legally responsible for the technology development team for Automotive high voltage power devices in Villach including people management as well as technical direction setting. You lead your team to best performance in order achieve the targets of our highly innovative company.

In your new role you will:

- **Lead a team** of experts and project managers **developing SiC-MOSFET, Si-IGBT and diode chip technologies** across various Infineon sites
- You and your team will **set technical direction** within the field of SiC and Si power device technologies for electro-mobility
- **Hire and on-board new team members** in a fast growing team and make sure that the team picks up speed quickly
- **Shape the future growth** of your team in accordance to the strategic needs of the electro-mobility market and in close alignment with the global and cross-divisional development teams
- **Manage interfaces** towards the various stakeholders within ATV and across
- **Foster continuous improvement** of development methods within your team and within the greater development community

### Profile

You communicate openly, clearly and act as a visible model of what you expect from others. You ensure high quality by foresighted planning, understand root causes of potential problems and develop lasting solutions.

You are best equipped for this task if you have:

- At least **6 years of relevant working experience** in the semiconductor industry, preferably in the area of chip technology development
- A degree in **Physics, Electrical Engineering**, or similar fields, preferable a PhD

## Why Us

**Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

**– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –**

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon ATV is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
