

Senior Project Manager (m/f/div*)

Job description

Do you consider yourself a natural driver and a project expert with great networking capabilities and experience? Are you open to new ideas and pushing them to their full implementation and application? Then we have the perfect challenge for you at Infineon in Bucharest. Join us as a Project Manager and become part of a highly skilled global team in a dynamic high-tech working environment.

As a Project Manager, you will be responsible for coordinating the activities of a team of experts that was assigned for the development of our products, assuring that all targets and deadlines are possible to be achieved while being a technical reference to the team.

In your new role you will:

- **Manage an interdisciplinary team consisting of different stakeholders from several departments** (Marketing, Application Engineering, Concept Engineering, Analog and Digital Design, Physical Design, Component Verification Engineering, Test Engineering, Production Engineering, and Quality)
- **Take responsibility for the whole product life cycle**, since the product idea, business case preparation, tracking of projects activities and execution of the R&D and finishing with the linked business case and successful transfer to the manufacturing stage
- **Contact directly with our customer during the definition and execution of the product development** and ensure the business success of your own products
- **Generate out-of-the-box solutions**

Profile

You're a dynamic and charismatic person who is able to connect with different people and create trustworthy relationships quickly. You have great communication skills and you're able to influence your colleagues in order to achieve a common goal. Furthermore, you still keep the focus on the customer needs making sure that the best solution is presented.

You are best equipped for this task if you have:

- A university degree in **Electronics/Electrical Engineering, Physics** or similar
- At least **5 years** of experience in electronics project management in an automotive or semiconductors company
- Knowledge of the **ISO26262 standards** would be an advantage
- Knowledge of **Agile methodologies** is a plus
