

Driving decarbonization and digitalization. Together.

Tax specialist (f/m/div)*

Job description

Are you passionate about numbers and possess a deep understanding of tax regulations and laws? Do you have a meticulous eye for detail and the ability to analyze complex financial information? A dynamic opportunity awaits you as a Tax Specialist at our company in Cegléd: a renowned technology organization where you can have a significant impact on implementing efficient tax strategies. Join our team and be a vital contributor to our tax compliance and optimization efforts!

As our new Tax Specialist, you will:

- Perform **taxation** activities and **financial analyses**.
- Perform the monthly, quarterly, and annual tax **reports** and **closings**.
- Coordinate and support **internal** and **external** Tax and Statutory **process changes**.
- Be up to date about tax information on **local** and **international tax rules**.
- Ensure the **internal tax controls** are applied.
- Contribute to the preparation of **transfer price documents**.
- **Cooperate** with **other Infineon sites** on tax issues.
- Take part in internal and external **audits**.

Profile

You are best equipped for this task if you have:

- A University or College Degree in a relevant field (**Finance, Economics, Taxes, Accounting**).
- Between **5-7** years of **experience** in Taxation (**VAT and Corporate Tax**).
- Fluency in **English**.
- Knowledge on **Hungarian tax rules**. Ability to read documents in Hungarian.
- **IFRS qualified accountant** qualification would be an advantage.
- A **register as tax adviser** or register as **accountant** (would be a great advantage).
- Knowledge of integrated systems (**SAP**) is a plus.

Please send us your CV in English.

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

Backend

The backend segments enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
