

# Driving decarbonization and digitalization. Together.

## Engineer Mask Design

### Job description

In your new role you will:

- Basic use and application of electronics and semiconductor fundamental principles, theories and concepts.
- To implement the physical layout of circuit based on schematics provided by circuit design engineers.
- Check the correctness of layout using DRC/LVS tools.
- To work with circuit design engineers in the evaluation of various circuit options and their impact on layout, and determine the optimize approach.
- To perform top level routing and connection of input output signals. Giving extra care to signals identified as sensitive to minimize possible coupling and parasitic.
- To perform top level bussing to satisfy current density and minimize IR drop throughout the chip.
- To develop standard physical cell library for new process technology.
- To involve in simple skill code scripting.

### Profile

You are best equipped for this task if you have:

- Working experiences: 0-2 years
- Technical / functional experience in years: 0-1
- Language and software skills + level: Cadence Virtuoso, Unix
- Education background: Bachelor's Degree

### Why Us

#### Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.
