

Driving decarbonization and digitalization. Together.

Working Student: Embedded AI & Automotive (f/m /div)

Job description

Looking for a captivating opportunity as a working student in the field of Embedded AI & Automotive? At Infineon, you'll have the chance to gain valuable experience in a dynamic, innovative, and internationally renowned company. Join our Automotive AI team in shaping the future of AI-driven automotive technologies and be part of the success story of a global leader in semiconductor solutions. Apply now to kickstart your career with us!

- **Focus on the future:** You will be responsible for the development of predictive maintenance and health monitoring concepts for Infineon's automotive semiconductors
- **Expand your horizons:** You will develop and evaluate AI models in the field of predictive maintenance
- **Holistic overview:** You will work on the design, implementation and testing of embedded software for the AURIX platform
- **Teamwork is dreamwork:** You will collaborate with technical experts from various departments

Profile

- **Study field:** You are currently studying Computer Science, Information Systems Engineering, Data Science, Electrical Engineering or similar
- **Skills:** You are proficient in C/C++ and Python, knowledge in Simulink is a plus
- **Interests:** You already gained knowledge in machine learning/deep learning and possess experience with a current deep learning framework
- **Experience:** You bring experience with edge devices and understanding of hardware constraints in the edge context
- **Language skills:** You have fluent English skills, written and spoken

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript (not older than 6 months)
- High school report

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

The **Development Center Dresden** was launched in 2019 and is growing successfully. Today, more than **120** top-class experts and young talents from **23** nations are working on research and development of new products and solutions for automotive and power electronics, software, chip design and verification, characterization of complex systems as well as development of products and solutions with artificial intelligence. In the long term, the Development Centre will employ around 250 people. State-of-the-art research and characterization labs facilitate R&D activities for automotive applications, electromobility and AI chips of the next but one generation. The Development Center covers the complete development value chain from product and system definition to qualification.

This is the right place for you, if you want to work in a high-tech environment, master challenges of advanced product development, be part of a multicultural team with great spirit and experience a startup-like culture.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

The **ATV division** is shaping the future of mobility by enabling clean, safe, and smart cars. Its product and solution offering is powering the decarbonization and digitalization of vehicles. By driving the transition to hybrid and purely electric vehicles, ATV is making a valuable contribution to cleaner roads. ATV is also increasingly

digitalizing cockpit, infotainment, comfort, and lighting applications as it takes automated driving to the next stage with higher levels of connectivity, security, and safety.

The ATV portfolio integrates sensors, microcontrollers, high-performance memories for specific applications, power semiconductors based on silicon and silicon carbide, as well as components for human-machine interaction and vehicle connectivity. Infineon is the world leader in automotive semiconductors.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
