

# Driving decarbonization and digitalization. Together.

## Quality Engineer (f/m/div)

### Job description

Do you enjoy working on the front end of a process, being challenged every day, and having a high-responsibility job? Are you a fast and analytical-thinking person, always looking for improvements and new solutions? Then this opportunity is certainly a good match for you. Join our team in Cegléd as a Quality Engineer, where an interesting multinational working environment is waiting for you!

As a Quality Engineer, you will play an active role in the production phase, actively contributing to quality assurance. You will analyze complex situations and different information to find precise and reliable solutions. In this role you will be in close contact with your team and other departments, also acting as a moderator during the discussion and debates regarding quality matters.

In your new role, you will:

- Provide general **support to the production line and operative work**, regarding quality engineering tasks;
- Support **deviation management** and **8D problem-solving** activity;
- Actively participate in **root cause investigation**;
- Take part in **improvement projects** using the **Six Sigma** methodology;
- Ensure and prepare **quality documentation**;
- Be in contact with the **quality business lines**.

### Profile

You are a communicative person that is able to establish successful cooperation within your team and other teams. You think analytically, you are agile and always focus on results. Your high standards and your quality orientation allow you to solve problems and provide reliable solutions. You are able to structure your work and to discuss it with your team, in order to work together and achieve the desired overcome.

You are best equipped for this task if you have:

- A university degree in **Mechanical Engineering, Electrical Engineering, Quality Engineering, Chemical Engineering, Engineering Management, Physics** or related fields;
- **At least 3 years of experience**, preferably in manufacturing environment and in-line operation;
- Knowledge of **statistical methods/programs** and previous experience with **quality tools** would also be appreciated.
- Good command of **MS Office tools**. Knowledge of SAP would be a plus;

## Why Us

### Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

### Backend

The backend segments enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

### We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant´s experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
