

Driving decarbonization and digitalization. Together.

Working Student: Master Data (w/m/div)

Job description

We are more than 58,600 employees worldwide at 86 locations. If you would like to gain experience working in a large project within a DAX40 company, while helping us make life easier, safer and greener, then this opportunity is just for you! We are looking forward to your application!

- **Experience project management:** You support project management activities, such as project reporting, scheduling and communications
- **Data is everything:** You generate excel/SAP based reports on sub-tracks of master data (e.g. material master data for raw materials)
- **Keep up to date:** You manage documentation of change, including new features, test cases and testing progress
- **Reliable work:** You assist project testing and migration activities
- **Being strong together:** You cooperate with the cross-functional and international project team in their daily business

Profile

- **Study field:** You are currently studying Computer Science, Business Informatics, (Industrial) Engineering or similar
- **Experience:** You already gained basic knowledge of SAP, preferably in one master data domain (e.g. SAP MM, SD,)
- **Skills:** You are versed in working Microsoft Office, especially PowerPoint and Excel
- **Personality:** You showcase adaptability, communication skills and attention to detail
- **Language skills:** You have excellent German and English skills, both written and spoken

Please attach the following documents to your application:

- CV in English
- Certificate of enrollment at university
- Latest grades transcript (not older than 6 months)
- High school report

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

With over 1.400 employees worldwide, Infineon **IT** is the driving power behind the Infineon's digitalization initiatives.

The Infineon Digital Agenda focuses on the Digital Customer Interface, Digital Products, Digital Services and End-to-End Process Digitalization. IT fosters customer success, utilizes cutting edge technologies and promotes new ways of working in a changing work environment. Operational excellence at benchmark cost in all services provided by IT is the foundation on which all new initiatives are built upon. Cloud Services, Applications, Platforms, Data centers, Networks, Infrastructure, and the entire R&D Computing environment are some examples of the services managed by Infineon IT. Beyond stable and reliable operations, Infineon IT strives for continuous improvement which is based on a core belief of delivering value for our the Infineon business. We play a key role in supporting the Infineon's key objectives of decarbonization and digitalization.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
