

Junior Talent Program Product Application Engineering (f/m/div)*

Job description

Are you ready to start your career in a fast-moving, future-oriented environment? We need talents like you to bring our automotive power distribution applications to the market and to win our customer hearts with smart solutions! The Junior Talent Program (JTP) at Infineon gives you full insight into how we come up with innovations. Our products enable automotive key-trends like eMobility, self-driving, secure and connected cars. Apply now and become part of shaping the future of mobility!

The **Junior Talent Program (JTP)** is an Austrian **trainee program** and **promoting instrument** for **young talents**, which offers university graduates attractive entry opportunities, individual competence development, as well as high-quality support and supervision.

During this Junior Talent Program, you will work within our Automotive Technical Marketing Team, where we define and realize leading edge products for automotive power distribution applications.

Your program can consist of the following elements:

- Becoming an **expert** of our **latest products** in order to **support** our **customers** in designing them into different automotive applications
- **Supporting** our **system verification team** in order to help our customers in debugging their solutions
- **Working together** with our **product definition engineers** to generate the needed design-in collaterals (tools, manuals, demonstrators, ...) for our customers
- **Analyzing** our **competitors** for automotive applications
- You will have the opportunity to **support with the promotion of our latest products** at our key carmakers

Joining the JTP will give you the big picture of Infineon: Our junior talents are prepared for taking on complex target functions by means of **tailor-made job rotations**, regular feedback loops, trainings, as well as joint networking. Over the course of **24 months**, you have **at least three different assignments**. By working in different departments, you can get an idea of what suits you best. From the beginning, you'll have a chance to roll up your sleeves and take on challenging tasks. Besides that, you have the opportunity to build strong relationships across sites, functions and departments, and to meet the JTP community face to face and at virtual conferences.

This position is temporary: the duration of the Junior Talent Program is 24 months, including 3-4 job rotations.

Martin Gabernig
Talent Attraction Manager

You are **curious** and **interested** in a broad range of topics. You don't expect things to be handed to you on a silver platter. You **love change** – which is guaranteed in the semiconductor industry. You are **pragmatic** and **analytic**, because we need both at Infineon. Standing still is not your thing. You **find inspiration** in **teamwork, collaborating** with your colleagues on the big picture

You are best equipped for these tasks if you have:

- **University degree (Master)** in **Electrical Engineering / Mechatronics** or comparable
- First experience with mainstream **simulation tools**, like PSpice as a plus
- First experience on **hardware**, like PCB design as a plus
- Fluent **English** skills
- Good **German** skills

If this is you, then we want to make it easy for you to apply:

All we need is your CV and your relevant certificates, such as your final university degree or your most recent university transcripts. Tell us more about your motivation for applying in a short cover letter. Convince us with your personality, special skills and experiences.

This position is subject to the collective agreement for workers and employees in the electrical and electronics industry, employment group G (<https://www.feei.at/leistungen/informations-service/mindestlohne-und-gehalter-2020>). A higher payment is negotiable depending on your expertise and skills.
