

Project Manager

Job description

We're looking for an experienced Project Manager who has a proven track record of managing software development lifecycle projects of small to medium complexities.

In your new role you will:

- Determine and define **project scope and objectives**
- **Plan resources** needed to reach objectives and manage resources in an effective and efficient manner
- Prepare **budget plan** based on scope of work, resource requirements and risks
- Track project costs in order to stay within budget
- Develop and manage a detailed **project schedule and work plan**
- **Provide project updates** on a regular basis to various stakeholders about strategy, adjustments, and progress
- Utilize industry **best practices, techniques, and standards** throughout entire project execution
- **Measure project performance** to identify areas for improvement
- Demonstrate technical competence to drive the project efficiently

Profile

You are best equipped for this task if you have:

- Overall **10-12 years of Project management and related experience**
- Must have 5+ years of experience in **managing projects with small to medium complexity**
- Proven track record in project management across all aspects of the development via Waterfall or Agile, across **the full Software Development Lifecycle**
- Experience of using **project planning tools** such as MS Project, Atlassian JIRA and Confluence, or similar
- Good to have : IPMA or PMP certification
