

## Manager Product Marketing - Magnetic Position Sensors for Consumer and Industrial (f/m/div)\*

### Job description

You are open to new ideas and ways of thinking and always challenge the status quo? You like to work in an agile environment and want to actively contribute to the success of our magnetic position sensors? Then this is your new opportunity to be at the heart of leading industry trends towards smarter devices and sensors! As Manager Product Marketing you will, either in full- or part-time, embrace the challenge of shaping our product strategy within the consumer and industrial market and drive our business development and growth within these markets.

In your new role you will:

- Develop a **successful business and product strategy** for a position **sensor products family in key consumer and industrial markets**
- Quickly capture, analyze and **understand relevant product and market requirements** as well as **competitive trends**
- **Work with our regional and sales organizations** to successfully develop and win business opportunities
- Drive in close **cooperation with technical marketing and R&D** the development of **product ideas** to successful products with a **competitive value proposition**
- Define and implement a **proper pricing, go-to-market and product ramp-up strategy**
- **Team up cross product line** and divisions **to grow the sensor business efficiently** and effectively as champion for our top consumer applications within our marketing team

This position is suitable for full- and part-time.

### Profile

In your role as Manager Product Marketing you respect different attitudes and point of views and use the creative potential they offer. In close collaboration with customers you demonstrate strong communication skills and know how to establish lasting relationships. While you have an excellent business sense and the ability to drive own ideas, you always stay open, flexible and focused on solutions with real added value.

You are best equipped for this task if you have:

- A degree in **Electrical Engineering, Industrial Engineering, Physics** or a comparable technical field
