

Staff Engineer Elect Design

Job description

- Contribute to Synthesis, STA and Timing Closure of complex, low power SoCs targeted for IOT and MCU markets.
- Constraints development for functional/test modes at pre/post layout stage.
- Low-power physical synthesis and equivalence checks.
- Responsible for timing analysis and convergence of large hierarchical designs.
- Work closely with physical design team for timing/SI closure

Profile

- Bachelor's or Master's degree with specialization in VLSI design
- Hands-on technical experience in constraints development
- Experience in timing analysis/closure across multiple modes and corners
- Expert user of industry standard tools for timing signoff
- Experience in scripting languages (shell, perl, tcl) and Make flow
- Understanding of 40nm/28nm technologies and associated timing/SI closure challenges
- Experience in low-power synthesis and equivalence checks will be a plus

Benefits

- **Bangalore:** Coaching, mentoring & networking possibilities ; Wide range of training offers & planning of career development; Regional and local talent programs; International assignments; Career paths: Management career, Project management career, Technical ladder career, Individual contributor career, Professional career; Flexible work timing, Part time work, Work from home; Home office; Health & wellness reimbursement, Employee motivation forum,

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.
