

Senior Project Manager & Project Lead for Product Security (f/m/div)*

Job description

Your heart beats for Project Management and you are curious about Product Security at Infineon? As our new Senior Project Manager, you will take over the whole project management for the sub-projects from requirements definition until product release. Take the challenge and you will get various insights in a wide range of security products and applications. This position is part of Infineon's Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Be responsible for the **Project Management** of the **sub-projects "Security Engineering"** within **product development** projects
- Take over the **planning, controlling, risk management, stakeholder management and reporting**
- Act as a **functional project manager** of an international and intercultural team **with focus in the US**
- Be responsible for the **support and coordination** of the **project teams** wrt. Product Security from requirements definition until product release
- Additionally, take over the management of **several agile projects in parallel** (multi- project management)
- Closely **cooperate with the product security team**

Profile

You are keen on working in a diverse team and with various interfaces? Do you want to further develop your knowledge at Infineon and be part of it? That is great! If you are additionally able to organize the work in a well-structure manner and to identify and manage risks appropriately, then you fit very well into our team.

You are best equipped for this task if you have:

- A **technical degree ideally in Electrical Engineering, Physics** or similar fields
- At least **6+ years of working experience** in **agile and classic Project Management ("waterfall")** methodologies, as well as the ability to combine both methods into a hybrid setup
- **Very good knowledge** of **product security** in **hardware, embedded software and applications** within the **semiconductor industry**
