

Quality Specialist (f/m/div)*

Job description

Do you consider yourself a natural problem-solver, always striving for high quality and efficiency? Do you thrive in a team environment by contributing with your ideas and solutions? Are you ready to face the challenge of working in a dynamic multicultural atmosphere? Then this is the perfect opportunity for you! Join us as a Quality Specialist in Cegléd and become part of a global quality management team striving for outstanding results.

As a Quality Specialist, you will ensure high quality standards and continuous processes efficiency and improvement. With a positive attitude and mindset, you will find the best way to solve a problem and your team working spirit will be your ally in discussing innovative solutions with your teammates.

In your new role you will:

- Develop and improve **Quality Plans**, to assure harmonized requirements of manufacturing process, customer and engineering;
- Assure **technical regulation** and **standards**;
- Be responsible for **integration projects**;
- Understand and analyze **product requirements**;
- Keep close **communication** with project management teams.

Profile

Although you are an analytical person, you have a teamwork spirit and excellent communication skills that allow you to be clear in your explanations. You also have an impeccable understanding of technical processes and a will to do your best work always focusing on quality. You are an experienced and driven QA engineer, capable of focusing on the customer requirements, with risk management skills, and a drive value through innovation mindset. You are pro-active, dynamic and energetic, always open to learn.

You are best equipped for this task if you have:

- A University Degree in **Mechanical Engineering, Electrical Engineering, Quality Engineering, Chemical Engineering, Engineering Management, Physics** or related fields;
- At least 5 years working experience in **Quality Management System** and in **Automotive Parts Manufacturing System**;
- Strong knowledge of **Quality management theory, principles, methodologies** and **techniques**;

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
