

Senior Project Manager for Product Development Discretes (f/m/div)*

Job description

Would you like to participate in a dynamic environment and develop Low Power MOSFETs for the industrial industry? You are an experienced project manager who likes to collaborate and coordinate between various stakeholders and manage challenges occurring along the way? We have the right opportunity for you. As Senior Project Manager & Product Development Engineer for MOSFET products, you take over the lead role for an assigned project. You will be responsible for the definition of the design as well as for managing, organizing and controlling projects for the realization of new low power transistor products. Sounds interesting? Then apply now and become part of a highly motivated team.

In your new job you will:

- Look at the **bigger picture, with business in mind**, in order to identify challenges and working closely with your stakeholders to come-up with solutions
- Form, **guide and motivate diverse, cross-functional project teams** across various Infineon sites
- **Manage projects** and therefore be responsible for the overall coordination of technology-, package-, and product projects
- Ensure that the projects are in compliance with **internal rules and regulations** at any stage of the project life-cycle
- Conduct a **forward-looking risk management** to identify possible mitigation measures and/or backup scenarios
- Contribute to **concept engineering**, including the definition of requirements for **new technologies, packages, and products**
- Setup **device characterization** and analyze measured data
- **Intensively collaborate** with package development

Profile

You are open to new ideas and receptive to other ways of thinking or working and have the passion and the courage to develop new and creative ideas. As a true team player you are aware of cultural differences, cooperate across boundaries and appreciate the contributions of other people. You demonstrate strong communication skills and know how to establish lasting relationships and networks with colleagues and clients. With your structured working style, you are able to demonstrate high quality standards for yourself and other people.

You are best equipped for this task if you have:

Talent Attraction Manager

- A **university/university of applied science degree in Electrical Engineering, Applied Physics** or comparable with **main focus on Device Physics**
- **5+ years of working experience in the semiconductor industry**, thereof at least 3+ years of project management experience
- Profound knowledge in **device- & semiconductor physics**
- A **project management certification** as a strong plus, ideally IPMA Level C certification
- Great **intercultural competencies** and communication skills in order to bring your messages across
- **Excellent English skills**, additional German skills or the willingness to learn is a plus

We offer competitive salaries and additional benefits based on your performance, experience and qualification. This position is subject to the collective agreement for workers and employees in the electrical and electronics industry, employment group I (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2022.pdf>). A higher payment is negotiable depending on your expertise and skills.

Benefits

- **Villach:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; Child care in Villach & Klagenfurt; On-site social counselling and works doctor; Health promotion programs; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Accessibility, access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing and data transfer capabilities –

Infineon **PSS** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

At **Infineon in Villach** you shape the technologies of tomorrow and work in an international environment with more than 3900 colleagues from over 70 nations. Your personal contribution will be valued and appreciated as the cornerstones of our success. And all that in beautiful surroundings which guarantee a high quality of life.

The **City of Villach** is located in the center of Carinthia, Austria’s southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Living in Austria also has many social, health-care-related and economic perks. The country’s social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a

particularly safe and wealthy country with a high quality of life. Villach benefits from its status as a “small town”, offering everyday living at affordable prices in an outstanding setting.
