

## Senior Project Manager for Chip Technology Development for E-Mobility (f/m/div)\*

### Job description

You want to drive the development of leading edge chip technologies in an international environment? You love to work with colleagues across departments and borders to achieve best results by using professional project management methods? You like to keep the big picture and at the same time dive deeply into technical topics? We have the perfect opportunity for you! As Senior Project Manager for Chip Technology Development you will develop ideas to their full implementation in an international environment! Come and join us! Work on the leading edge of the promising E-Mobility movement and take the technology development of our power devices to the next level! Apply now to become part of Infineon Villach!

As Senior Project Manager you are responsible for highly complex projects with strong visibility to the product lines. Furthermore, you lead your team to best performance in order to achieve the targets of our highly innovative company.

In your new role you will:

- **Plan, control and execute development projects** for SiC-MOSFET, Si-IGBT and diode chip technologies across various Infineon sites
- **Form, guide and motivate cross functional project teams** - you create energy and commitment by explaining and keeping a good team spirit
- Take on **full project responsibilities** by continuously **assessing the progress** and **adjusting the project plan** to ensure that goals are met even in the face of challenges - includes anticipating and proactively managing significant changes to the existing project scope
- Maintain the **overview** and understanding of **technical interdependencies** in order to proactively **identify challenges** and working closely with your stakeholders to come-up with solutions
- Actively **manage internal and external key stakeholders** in an international environment, **negotiate trade-offs** and motivate others towards common goals
- Conduct a **forward-looking risk management** to identify possible mitigation measures and/or backup scenarios as well as opportunities

This position is part of the **Project Management Career Path**. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members. You want to learn more about the role as a Project Manager? Check out our profile story!

**Martin Gabernig**

Talent Attraction Manager

You communicate openly, clearly and act as a visible model of what you expect from others. You ensure high quality by foresighted planning, understand root causes of potential project delays and develop suitable solutions.

You are best equipped for this task if you have:

- At least **6 years of relevant working experience** in the semiconductor industry, thereof **4 years as a project leader** preferably in the area of chip technology development
- A degree in **Physics, Electrical Engineering**, or similar fields
- A solid technical understanding of **power electronic device physics, wafer technology development** and **semiconductor processing**
- A **proactive mindset** with **strong moderation skills** to align between various stakeholders and foster innovative approaches
- The ability to **understand** and lead in **complex project situations: manage crisis situations**, consolidate and present those to senior management level
- **Convincing communication** and **presentation skills** to work successfully with internal and external stakeholders
- Excellent **English** skills, German as a plus

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group I (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2022.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

## Why Us

**Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

**– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –**

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon ATV is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
