

Senior Manager Production Management ATV HP MOS (f/m/div)*

Job description

Are you looking for a new challenge? Are you an innovative and future-oriented person experienced in the semiconductor industry? Then this might be your chance to level up your career! In this position you will work in an international team and carry out cost, quality and capacity projects worldwide. Sounds interesting? Don't miss this chance and apply now!

In your new role you will:

- Be responsible for the **overall technical management of automotive products** in the ramp up and high volume production
- **Drive cross functional ramp up teams** as a project lead
- Act as a **driver and leader of change and transfer projects** (technology & products)
- **Be the contact for all Infineon internal and external production sites** as well as for operations for the respective product groups
- **Drive cost of sales improvements in frontend and backend** through yield, test, or process improvements for automotive in cooperation with all related production sites
- **Contribute to strategies** for assuring capacity growth and cost reduction
- **Take responsibility, drive assessments and make decisions** for benefit of whole product line.
- **Independent working style** and problem solving capability
- **Solid experience in managing projects** in an international setup
- Profound and proven **problem solving capabilities**, e.g. based on Six Sigma method
- **Strong communication and negotiating skills** to manage global and multicultural stakeholders and networks successfully

Profile

You are best equipped for this task if you have:

- **A degree in Electrical Engineering, Physics, Microelectronics** or similar
- At least **6 years of professional experience** and thereof 4 years of leading projects and project teams
- **Hands on project management skills** in the arena of MOSFETs, discrete products or power conversion

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon ATV is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
