

Driving decarbonization and digitalization. Together.

Internship - Business Continuity

Job description

The student, as part of the Business Continuity team and under the guidance of the assigned mentor, will undertake projects to work on / improve existing processes within Data Protection, Export Control, Security, and Corporate Real Estate.

In your new role you will:

- **Assist** in the **review of Infineon's major processes** - not limited to manufacturing and financial systems, learn how to **spot discrepancies**, use **data analysis & visualization** platforms, **create controls** to manage non-compliant behaviour
- **Understand grey market threats** and participate in **anti-counterfeit controls** in processes - not limited to product quality rejects, scrap, engineering samples, etc.
- **Receive training on Export Control** in Infineon, learn how export control compliance facilitates business growth and support EC data analysis / projects using data visualization platforms
- **Conduct market research and review** of Infineon's footprints in the Asia-Pacific & Japan regions, as well as **provide support with ongoing projects** including renovation projects, site consolidations and new sites/expansions
- Learn more about **Data Protection laws** in the region and support our Data Protection Officer in complying with the relevant regulations
- **Support training awareness activities** in preparing training content for our regional and global colleagues, such as but not limited to workshop materials, short videos, training decks and visuals

Internship learning outcomes:

- Achieve an entry level understanding of the roles played by multiple supporting functions at the regional headquarters, specifically in Data Protection, Export Control, Security, and Corporate Real Estate by working closely with the respective regional heads on a rotational basis
- Develop a better understanding of the inter-dependencies across various functions in a global company and how to work as a team
- Opportunity to participate in corporate audits and reviews, training development and ad-hoc projects

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant 's experience and skills.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
