

Driving decarbonization and digitalization. Together.

Senior Test Concept Engineer (f/m/div)

Job description

Would you like to pursue a career in Test Engineering? Are you ready for a new challenge? As a Senior Test Concept Engineer at Infineon, you are part of the innovation process, and you will be the quality gate for future semiconductor technologies. Come and join our dynamic and experienced Test Concept Engineering team in Cegléd where you can find the right environment and resources to achieve top results!

As a Senior Test Concept Engineer, you'll be responsible for ensuring the seamless and uninterrupted functioning of electronic testing devices, equipment, and instruments. You will play a key role in helping us develop and enhance complex testing solutions for new products and be actively involved in the preparation and introduction of new equipment into production.

In your new role you will:

- Complete **electrical test projects** and tasks by the scheduled deadlines and according to our quality targets;
- Prepare the **technical specifications of new equipment** and the **technical evaluation of received offers**, as well as the decision proposal;
- Introduce the relevant **test equipment into production**;
- Develop **new processes** and **optimize the existing ones**;
- Implement **new types for electrical tests**;
- Manage, coordinate and complete the **changes within the company's management software**;
- Act as a **project leader for test area related projects**, managing small teams when needed (e.g. Taskforce, Yield improvement);
- Develop **hardware/software relevant tests**, creating and introducing test specifications.

Profile

You are a results-driven professional with an Electrical background. You are a highly innovative person, able to recognize possible efficiency improvements and focused on solutions, but also open-minded and flexible regarding feedback. Additionally, you have the analytical ability to make the right decisions in a characteristically dynamic production environment.

You are best equipped for this task if you have:

- A University Degree in **Electrical Engineering**;
- At least **5 years** of relevant work experience, related to this field of work;

At a glance

Location:

Job ID: **HRC0647289**

Start date: **as soon as possible**

Entry level: **3-5 years**

Type: **Full time**

Contract: **Permanent**

Francisca Dias
Recruiter

- Relevant experience in **electrical measurement** or development;
- **Good command of English** and **fluency in Hungarian** as mandatory;
- **LabVIEW or C# knowledge** would be an advantage.

Please, send us your CV in English.

Benefits

- **Cegléd:** Coaching, mentoring, networking possibility; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Hybrid work model; Part-time work possible (also during parental leave); Sabbatical; Holiday child care; Access to on-site gym; On-site canteen available; Corporate pension benefits; Annual Performance Bonus; Service Anniversary Bonus; Free Parking available; Support for commuting to work, both by public transport and by car; Possibility to work remotely from abroad (EU)

Why Us

Driving decarbonization and digitalization. Together.

Infineon designs, develops, manufactures, and markets a broad range of semiconductors and semiconductor-based solutions, focusing on key markets in the automotive, industrial, and consumer sectors. Its products range from standard components to special components for digital, analog, and mixed-signal applications to customer-specific solutions together with the appropriate software.

Backend

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly, and testing.

We are on a journey to create the best Infineon for everyone.

This means we embrace diversity and inclusion and welcome everyone for who they are. At Infineon, we offer a working environment characterized by trust, openness, respect and tolerance and are committed to give all applicants and employees equal opportunities. We base our recruiting decisions on the applicant's experience and skills.

We look forward to receiving your resume, even if you do not entirely meet all the requirements of the job posting.

Please let your recruiter know if they need to pay special attention to something in order to enable your participation in the interview process.
