Become a part of our thriving partner ecosystems

Together we can unleash our true potential

The Infineon Partner Program is a global ecosystem of qualified companies, who are experts in designing products, solutions or services leveraging Infineon components in five key domains: software, hardware, services, tools & end-applications.

Together, our partners and us, share expertise, develop exceptional customer solutions and jointly drive new business opportunities.

Through numerous benefits, resources and support, our mission is to provide a profitable, comprehensive and sustainable program that fosters mutual growth.

Our partners benefit from new business generation, marketing and promotions, as well as technical support and enablement.

Partnering up is an integral part of Infineon's core values

“Partnering up is not just a value at Infineon - it's a crucial part of how we operate. By working together with our partners, we create innovative solutions that benefit everyone involved. Jointly, we can push the limits of our complementing capabilities to enable a faster time-to-market and true innovation for our customers in growth areas such as energy, mobility, and IoT.”

Andreas Urschitz,
CMO Infineon Technologies

Infineon's growth areas

Together with our global partner ecosystems, we shape the market in these three key growth areas: energy, mobility and IoT.

Energy – green and efficient

Rising demand for energy, depleted natural resources, and climate change call for more efficient ways of generating, transmitting, storing, and consuming energy. Our semiconductor solutions allow energy to be created and used more efficiently. We play a major role in the journey towards a net zero world.

We make green energy happen.

Mobility – clean and safe

Today, we are facing a new era of mobility with rising expectations around electrification, automation, convenience, and reliable connectivity.

Our semiconductor solutions drive the transformation towards clean, safe, and smart mobility services across all means of transport.

We shape the future of mobility.

IoT – smart and secure

As the digital transformation advances, demand for intuitive, secure, and smart ‘things’ is rising across everything from buildings and homes to factories and cities. Our semiconductor solutions make connected ‘things’ context-aware, intelligent, energy-efficient, and secure.

We make IoT work.

Let's create and commercialize joint solutions in five domains

Hardware

Partners manufacturing electronic components, boards, modules & turnkey solutions

... jointly we create and commercialize value-added solutions, while reaching new buyers

Software

Partners programming various types of software, algorithms & operating systems

... jointly we enhance our portfolio with complementary components and expand technology know-how

Tools

Partners designing computer programs for the development of embedded systems

... jointly we enable a complete and immersive development experience for customers

Services

Partners providing cloud & engineering services, application support or trainings

... jointly we build-up engineering capabilities and offer it to a world-class customer network

End application

Partners creating end-products & related applications

... jointly we provide customers with state-of-the-art solutions and innovative use-cases

Why partner with Infineon?
