### Update on the integration process of International Rectifier and planned changes in our manufacturing landscape

Dear valued customer,

In January, we informed you about the acquisition of International Rectifier. Since that time, we have been working diligently on a smooth and seamless integration of the International Rectifier organization and business into Infineon. We have made significant progress on many topics. Among others, we have assigned all of the responsible account managers and sales teams to their dedicated roles and responsibilities. We have begun the consolidation of our sales offices in those locations where both Infineon and International Rectifier have been present, and we are working on the convergence of the customer facing IT tools.

As part of the integration process, we have also analyzed Infineon and International Rectifier's manufacturing sites. We will continue International Rectifier's strategy to transfer technologies into respective silicon foundries and use subcontractors. Accordingly, a part of the portfolio is in transfer or has already been qualified at our outsourcing partners. Today, we would like to inform you about planned changes for International Rectifier's manufacturing operations in Newport, UK, and in Singapore.

- Our **Newport manufacturing site in the UK** will continue operations until the end of calendar year 2017. The majority of technologies and products are already qualified in other manufacturing sites, further transfers are in progress and will be complemented by transfers into the major IFX-sites. The overall concept will allow you a timely and seamless migration, in case you are affected.

#### Infineon Technologies AG

Postal Address D-81726 München Internet [www.infineon.com](http://www.infineon.com) Headquarters Am Campeon 1-12, D-85579 Neubiberg Phone +49 (0)89 234-0

Chairman of the Supervisory Board Wolfgang Mayrhuber

Management Board Dr. Reinhard Ploss (CEO), Dominik Asam, Arunjai Mittal

Registered office Neubiberg Commercial Register Amtsgericht München HRB 126492

- Products currently manufactured in our **Singapore Techview manufacturing site** are already fully qualified and in volume production at other sites. We plan to ramp-down the Singapore Techview manufacturing site by the end of calendar year 2015.

Operations in all other manufacturing sites worldwide will continue as planned and previously communicated. We will continue to ensure that our high-quality products will be delivered to you on time as you are used to.

Rest assured that we will use the established processes and interfaces to involve you in a timely manner regarding potential changes that will result from these decisions, in case you are affected. We will reach out to you in the next days to clarify all operational details.

Thank you very much for your trust and support as two world leading companies in Power Management come together, with the goal to serve you even better.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Arunjai Mittal". The signature is written in a cursive, flowing style with a horizontal line underneath.
