

# SMARTi 3G

Nearly every major mobile phone manufacturer uses our radio frequency (RF) transceivers. Our latest product for 3G mobile phones, the SMARTi 3G, should ensure this continues. It is particularly versatile: the only RF transceiver so far that can be used on all of the world's UMTS networks, enabling you to use your phone everywhere. Whether at home, on the shore of Huanpu or at the foot of Popocatepetl.
