

# Company presentation

Infineon Technologies AG

May 2025

# Driving decarbonization and digitalization. Together.

Semiconductors are crucial to solve the energy challenges of our time and shape the digital transformation.

This is why Infineon is committed to actively driving decarbonization and digitalization.

As a global semiconductor leader in power systems and IoT, we enable game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT.

We make life easier, safer, and greener. Together with our customers and partners. For a better tomorrow.

# Infineon is a global leader in power systems and IoT

<sup>1</sup> 2024 Fiscal year (as of 30 September 2024) | <sup>2</sup> As of 30 September 2024

# Infineon leading in power systems – mastering all three key materials

- » Reliable multi sourcing of raw materials
- » World-scale fabs

- » Application understanding
- » Packaging know-how and hybridization competence

## Leadership in Power Systems across all materials and technologies

**Silicon**  
Diode – MOSFET – IGBT – Driver – Controller

**Silicon carbide**  
Diode – MOSFET

**Gallium nitride**  
HEMT – Driver

# Infineon leader in IoT – driving digitalization by serving strongly growing multi-application markets

## Consumer IoT

## Industrial IoT

## Automotive IoT

Products: MCU – Connectivity (Wi-Fi, BLE, NFC) – Sensors – Security – Power supply & switches

# Semiconductor market forecasts predict growth for 2025 & 2026

## Global Semiconductor Market

Market size in billion US-Dollar

Source: WSTS for historical data. | Forecast: of WSTS, Omdia, Gartner, TechInsights; last update 29 April 2025

# Infineon is clear #1 in Automotive and power semiconductors, and also #1 in the overall microcontroller market

## Automotive semiconductors

2024 total global market: USD 68.4bn<sup>1</sup>

## Power discretes and modules

2024 total global market: USD 32.3bn<sup>2</sup>

## Microcontroller suppliers

2024 total global market: USD 22.4bn<sup>3</sup>

<sup>1</sup> TechInsights: Automotive Semiconductor Vendor 2024 Market Shares. # Infineon is globally positioned with its network of Frontend and Backend manufacturing facilities

15 locations<sup>1</sup>

<sup>1</sup> As of 30 September 2024 ● Frontend ● Backend

# Our global Research and Development activities

## About 13 percent

of Infineon's annual revenue goes into Research and Development (R&D). In fiscal year 2024, R&D investments amounted to about 2 billion euros.

## 29,900 patents and patent applications in the overall portfolio

show a high level of innovative strength and longterm competitiveness. In fiscal year 2024 alone, Infineon registered about 1,900 new patent applications.

## Numerous innovative ecosystems

with tech companies, universities and research institutes are of great importance to Infineon.

## 71<sup>1</sup> sites in 27 countries and regions:

<b>Americas</b>	Kanata (Canada); Guadalajara, Tijuana (Mexico); Andover, Austin, Chandler, Colorado Springs, El Segundo, Irvine, Leominster, Lexington, Lynnwood, Morrisville, Murrieta, Portland, San Diego, San José and Warwick (all USA)
<b>Asia Pacific</b>	Bangalore (India); Batam (Indonesia); Bundang and Seoul (both Korea); Ipoh, Kulim, Melaka and Penang (all Malaysia); Muntinlupa (Philippines); Singapore (Singapore); Nonthaburi (Thailand); Hanoi (Vietnam)
<b>Greater China</b>	Chengdu, Shanghai, Shenzhen, Wuxi and Xi'an (all Mainland China); Hsinchu and Taipei (both Taiwan)
<b>Japan</b>	Nagoya, Sendai, Tokyo (all Japan)
<b>Europe</b>	Graz, Klagenfurt, Linz and Villach (all Austria); Le Puy-Sainte-Réparate (France); Augsburg, Dresden, Duisburg, Erlangen, Ilmenau, Langen, Neubiberg, Regensburg, Soest and Warstein (all Germany); Budapest and Cegléd (both Hungary); Cork and Dublin (both Ireland); Netanya (Israel); Padua and Pavia (both Italy); Brasov, Bucharest and Iasi (all Romania); Stockholm (Sweden); Zurich (Switzerland); Belgrad (Serbia); Bristol and Redhill (both UK); Lviv (Ukraine)

# Responsible action, sustainable profitable growth

## Infineon ranks among the most sustainable companies in the world

- Sustainability at Infineon includes social, ecological, and economic values
- Infineon was one of the first semiconductor companies to voluntarily commit to the Ten Principles of the UN Global Compact
- Infineon meets global societal challenges such as climate protection, energy efficiency, and resource management with innovative products
- Infineon's climate target is to become carbon-neutral by 2030<sup>1</sup>. Emissions are to be cut by 70 percent over the 2019 calendar year<sup>2</sup> levels by 2025
- External evaluation of the commitment:
  - MSCI ESG Research rates Infineon with AAA for the first time after receiving an AA rating in the previous five years
  - Included in the Dow Jones Sustainability Index family for the 15<sup>th</sup> year in a row
  - Awarded Gold status for six years in a row and in 2024 for the third time Platinum status by EcoVadis

<sup>1</sup> In terms of Infineon's direct and indirect energy- and heat-related emissions (Scope 1 and 2). | <sup>2</sup> Including Cypress.  
For further information: [Infineon Sustainability Report](#)

# Infineon's Global Environmental Sustainability Strategy focuses on four areas of action

## Sustainability at our sites

Our production facilities, buildings, and plants have a minimal footprint

## In our supply chain

Infineon acts in an environmentally conscious and socially responsible manner across its supply chain

## As part of our culture

Our employees make a voluntary contribution to creating a sustainable world

## With our products

Our products are built into many different applications that make a significant contribution to decarbonization

"As Chief Digital and Sustainability Officer of Infineon Technologies, I will use my mandate to drive both - our digital and green transformation - together with our colleagues, customers, and partners around the world. This also means realizing new and disruptive ideas."

**Elke Reichart**

Chief Digital and Sustainability Officer

## Infineon is committed to binding CO<sub>2</sub> reduction targets

- 1** | Carbon neutrality<sup>1</sup> by 2030 – primarily by avoiding direct emissions and increasing energy efficiency
- 2** | Expansion of climate strategy to the supply chain by committing to set a Science-Based Target to include Scope 3
- 3** | Infineon's products and solutions enable a net-zero economy and link the real and the digital world

<sup>1</sup> Scope 1 and 2

# Corporate Social Responsibility: We create a net ecological benefit

In various areas of application (automotive electronics, industrial drives, photovoltaics as well as wind energy), our products can achieve CO<sub>2</sub> savings during their lifetime of around 130 million tons of CO<sub>2</sub> equivalents. Compared with the European electricity mix, this is around 17.6 percent of the annual net electricity production of the European Union.

**Net ecological benefit: CO<sub>2</sub> emissions reduction of more than 127 million tons**

<sup>1</sup> This figure takes into account manufacturing, transportation, own vehicles, travel, supplier-specific emissions, water/waste water, direct emissions, energy consumption, waste etc. as well as direct and indirect energy-related emissions by manufacturing service providers. It is based on data collected internally and publicly available conversion factors and relates to the 2024 fiscal year.

<sup>2</sup> This figure is based on internally established criteria, which are described in the explanatory notes. The figure relates to the 2023 calendar year and takes into account the following application areas: automotive electronics, industrial drives, photovoltaics as well as wind energy. CO<sub>2</sub> savings are calculated based on the potential savings generated by technologies in which semiconductors are used. The CO<sub>2</sub> savings are allocated based on Infineon's market share, semiconductor share and the lifetime of the technologies concerned, based on internal and external experts' estimations. Despite the fact that carbon footprint calculations are subject to imprecision due to the complex issues involved, the results are nevertheless clear.

# As an early mover in the industry, Infineon provides customers with product carbon footprint data

Providing transparency from our corporate actions down to the individual product level

Enabling customers to gain deeper insights into their carbon footprint along their own value chain

Creating levers to foster more effective strategies for customers' own CO<sub>2</sub> emissions reduction

"By providing comprehensive product carbon footprint data, we are driving the vision of a net-zero society and enabling our customers to reduce carbon emissions even more effectively."

Elke Reichart

Chief Digital and Sustainability Officer

# Infineon promotes respect for human rights, the environment and safe working conditions

## Together for human rights

Our commitment to internationally recognized human rights principles and standards, namely International Bill of Human Rights and its Universal Declaration on Human Rights is reflected in our:

- **CSR Policy**
- **Human Rights Policy**
- **Business Conduct Guidelines**
- **Supplier Code of Conduct**

Any suspicion of human rights violations or concerns can be raised by any stakeholder to either our Human Rights Officer, Compliance or through our whistleblower hotline Infineon Integrity Line.

## Integrated Management Program for Environment, Energy, Safety & Health (IMPRES)

IMPRES is an internally developed management system which aims to fulfill the legal requirements and ensure:

- Efficient resources management
- High safety and health standards
- Environmental protection
- Efficient energy management

It is structured and certified in accordance with:

ISO  
14001<sup>1</sup>

ISO  
45001<sup>1</sup>

ISO  
50001<sup>2</sup>

<sup>1</sup> Since 2005 Infineon has a worldwide certification at all major manufacturing sites and corporate headquarters. | <sup>2</sup> Since 2012 Infineon is certified at the largest European manufacturing sites and corporate headquarters.

# Infineon's employees create a better future together

At Infineon, 58,060<sup>1</sup> people from over 100 countries work together around the world to make life easier, safer, and greener. For more information, please visit [www.infineon.com/career](http://www.infineon.com/career)

## Preethi Baran

Senior Director, Field Sales,  
in Livonia

"It's motivating to work with our customers to transform our mobility through innovation, safety and security."

## Thomas Wrzesinsky

Maintenance Technician,  
in Dresden

"We maintenance technicians keep production moving. I appreciate the teamwork: when everyone pulls together to find the error and to get the equipment running again."

## Marcel Kuba

Director, Field Application Engineering,  
in Munich

"The acquisition of Cypress enables Infineon now to offer complete best in class system solutions for new automotive applications."

## Dr. Pamela Lin

Senior Manager, Data Scientist  
Analytics, in Wuxi

"It's amazing how we use advance data analytics and AI techniques to create intelligent systems for solving complex business problems and driving manufacturing efficiency."

<sup>1</sup> As of 30 September 2024.

# Our competitive advantage: Differentiating as quality leader

## Our path

We do what we promise.  
That's quality made by Infineon.

## Our aspiration

Zero defect regarding the committed

- Functionality
- Time
- Reliability
- Volume and cost

## Our foundation

International standards such as  
ISO 9001, IATF 16949, AS 9100,  
IEC 17025, ISO 26262
