

Errata Sheet

This document lists the errata of the following members of the Automotive EiceDriver™ family in addition to the contents of their respective Data Sheet.

Listed items are currently known deviations from the specified information of the Data Sheet and are valid for the below mentioned products.

Table 1 Affected Products or Engineering Samples

Product Name	Datasheet Version	Datasheet Release Date
1ED020I12FTA	2.1	2013-05-21

1 Two-level Turn-off

The typical value for V_{TLSET} is shifted by 150mV.

The delta between minimum and maximum values for V_{TLSET} is improved to 600mV.

Table 2 Affected datasheet parameter

Parameter	Symbol	Values			Unit	Note/ Test Condition
		Min.	Typ.	Max.		
Reference Voltage for setting two-level delay time	V_{TLSET}	6.6	7	7.3	V	-

Table 3 Updated datasheet values

Parameter	Symbol	Values			Unit	Note/ Test Condition
		Min.	Typ.	Max.		
Reference Voltage for setting two-level delay time	V_{TLSET}	6.85	7.15	7.45	V	-
