

Config Wizard for SPIDER+

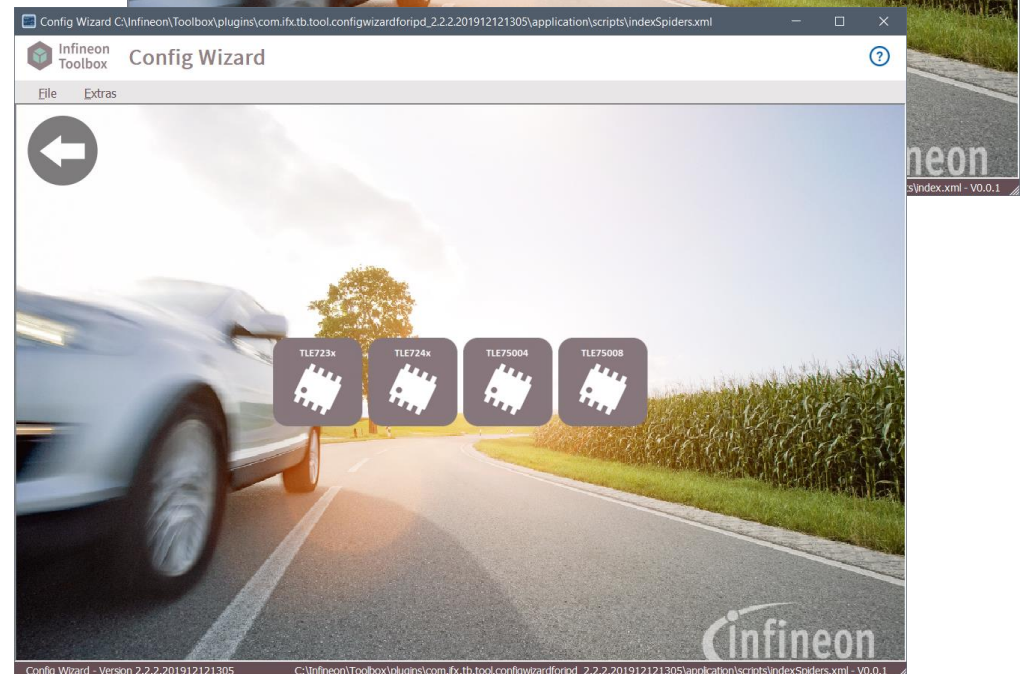

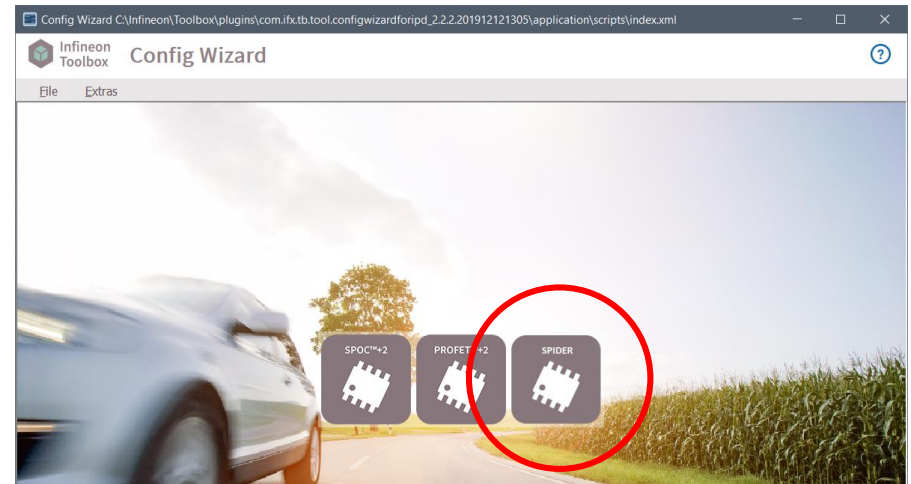

Config Wizard for SPIDER+

- › The addition of SPIDER and SPIDER+ products into the Config Wizard for IPD allows to use the devices without worrying about the details of the communication protocol
- › To use it download the Infineon Toolbox from <https://www.infineon.com/toolbox> and install the „Config Wizard for IPD“ app
- › For communication with the device the uIO stick is required <https://www.infineon.com/uIO>

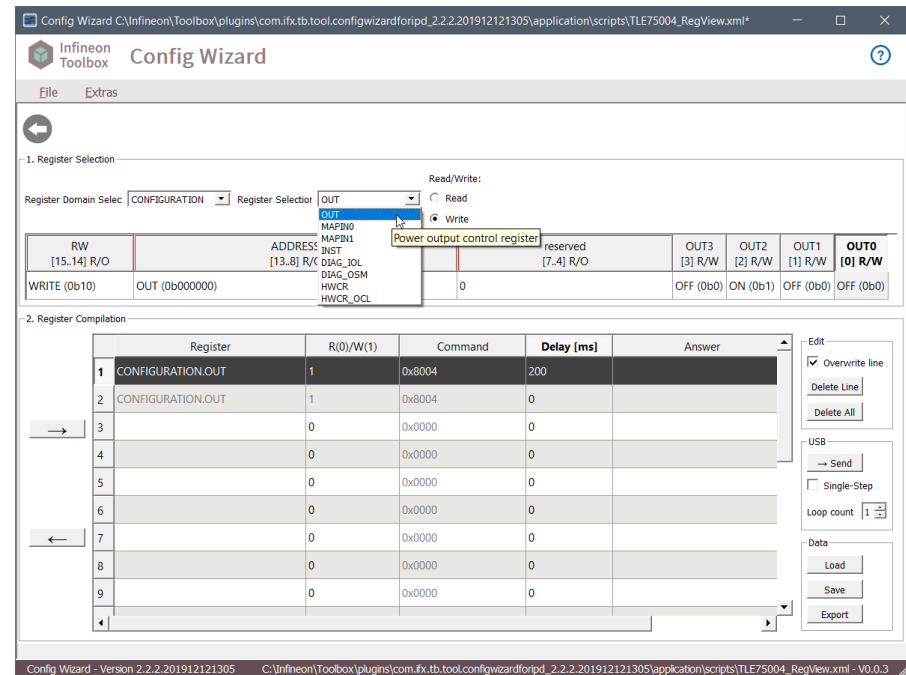

Config Wizard for SPIDER+

- > The product group SPIDER contains Config Wizard applications for SPIDER and SPIDER+ products
- > Currently two SPIDER and two SPIDER+ products are available with more products being added soon

Config Wizard for SPIDER+

- > Within the app you can configure all registers by selecting them from a drop down menu and setting the individual configurations in the register view
- > The configured register has to be added to the command table before it can be sent to the device
- > An optional delay after each command can be set in the command table to allow timed command sequences

Part of your life. Part of tomorrow.
