# EZ-BT™ MODULE PROGRAMMING KIT

## CYBT-483039-PROG

To use the CYBT-483039-PROG:

1. Insert the BLE module in the socket (ensure that the BLE module is in the correct position of the socket, as shown below).

**Figure 2: Module in the Socket**

2. Connect the programming device with a USB cable to a computer that has been installed with WICED Module Programmer ([www.cypress.com/WICEDModuleProgrammer](http://www.cypress.com/WICEDModuleProgrammer)).
3. Run the programming software to program the target BLE module with your selected firmware.
