

# Resonant LLC Half-Bridge Controller IC

ICE1HS01G – Output Power vs Efficiency

ICE2HS01G – Output Power vs Efficiency

## Product Highlights

### Resonant LLC Half-Bridge Controller IC

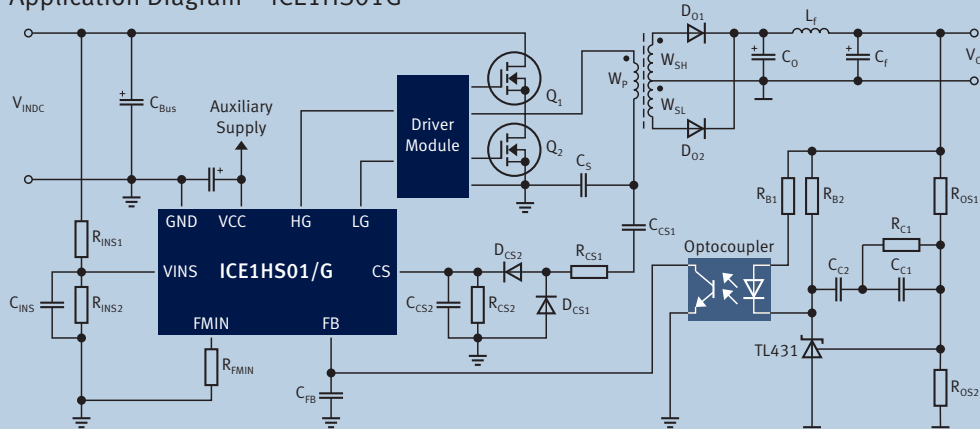

- Minimum number of external components
- High accuracy oscillator
- Two-level over current protection
- Over load/open loop protection
- Mains undervoltage protection with adjustable hysteresis
- Adjustable blanking time for over load protection and restart

### Resonant LLC Half-Bridge Controller IC with Synchronised Rectification Control

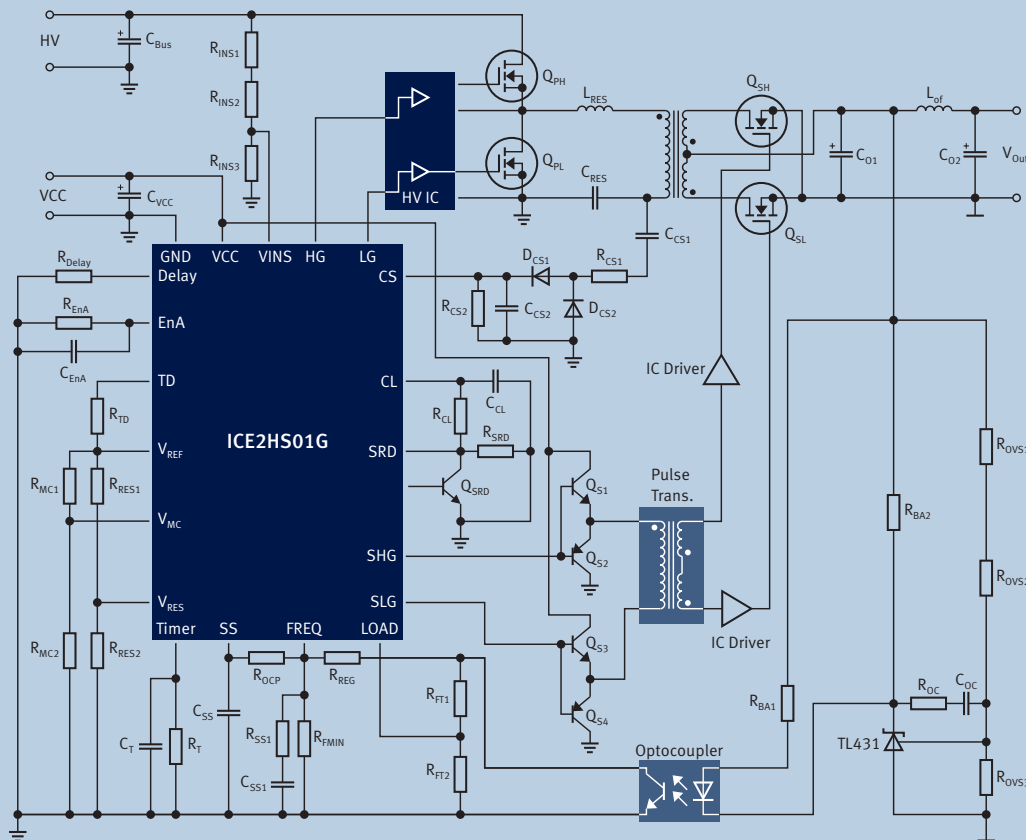

- 30kHz~1MHz switching frequency range
- High efficiency over wide load range
- Innovative drive method for synchronous rectification
- High accuracy frequency setting
- High accuracy setting and adjustable dead time
- Over load/open loop protection with adjustable blanking time and restart time
- Mains undervoltage protection with hysteresis
- External latch-off and over temperature protections
- DSO-20 package

# Resonant LLC Half-Bridge Controller IC

**ATTENTION PLEASE!**

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics ("Beschaffenheitsgarantie"). With respect to any examples or hints given herein, any typical values stated herein and/or any information regarding the application of the device, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation warranties of non-infringement of intellectual property rights of any third party.

**INFORMATION**

For further information on technology, delivery terms and conditions and prices please contact your nearest Infineon Technologies Office ([www.infineon.com](http://www.infineon.com)).

**WARNINGS**

Due to technical requirements components may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies Office. Infineon Technologies Components may only be used in life-support devices or systems with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support device or system, or to affect the safety or effectiveness of that device or system. Life support devices or systems are intended to be implanted in the human body, or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.
