<sup>1</sup> IR HiRel does not currently have a DLA Certified Radiation Hardness Assurance Program.

<sup>2</sup> Turn-On Time ( $t_{on}$ ) includes the turn-on delay and rise time; Turn-Off Time ( $t_{off}$ ) includes the turn-off delay and fall time.

<sup>3</sup> Reference Fig. 2 for Switching Test Circuits and Fig. 3 for Switching Test Wave Form.

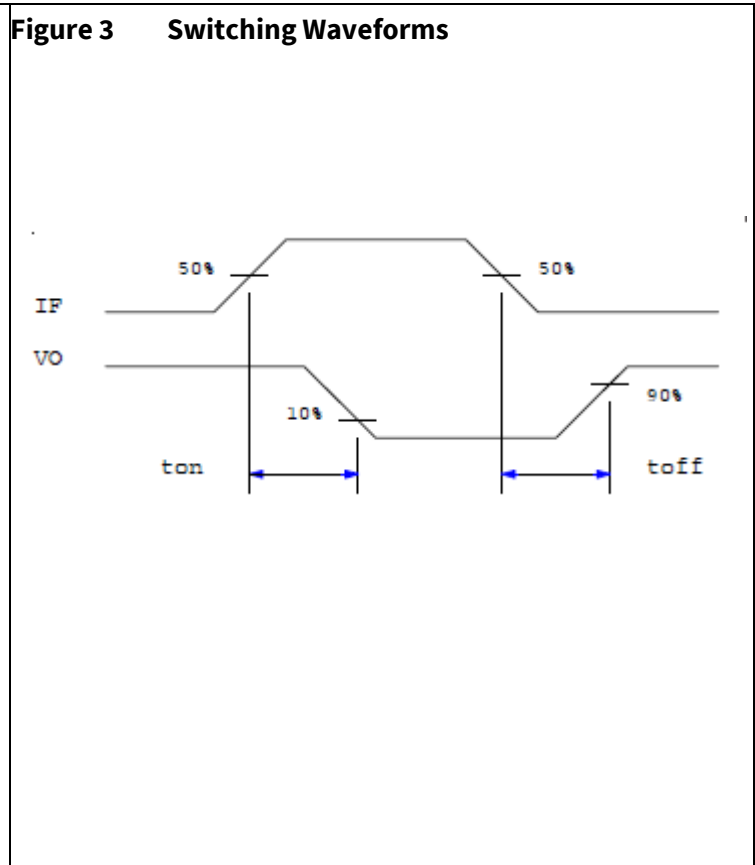

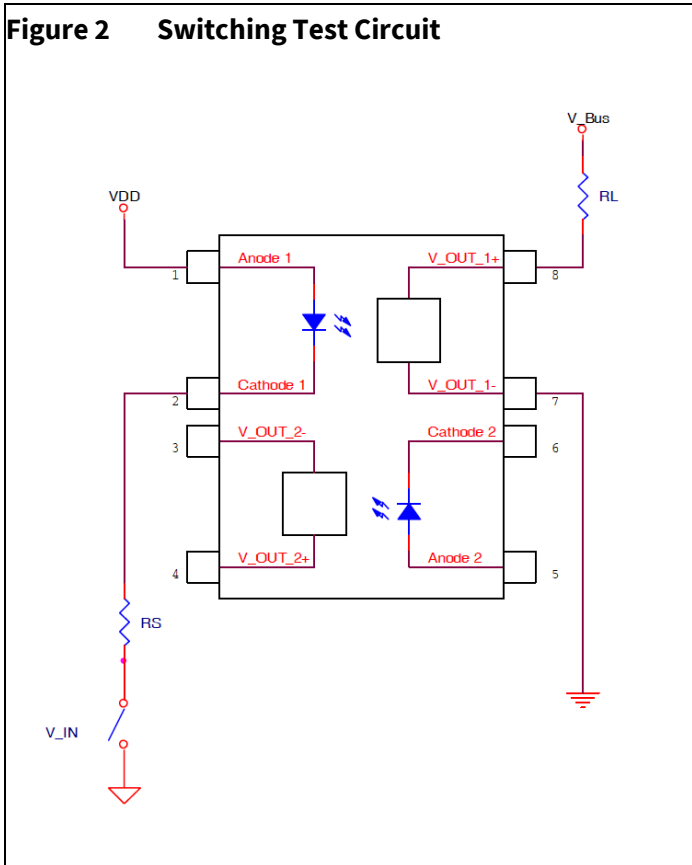

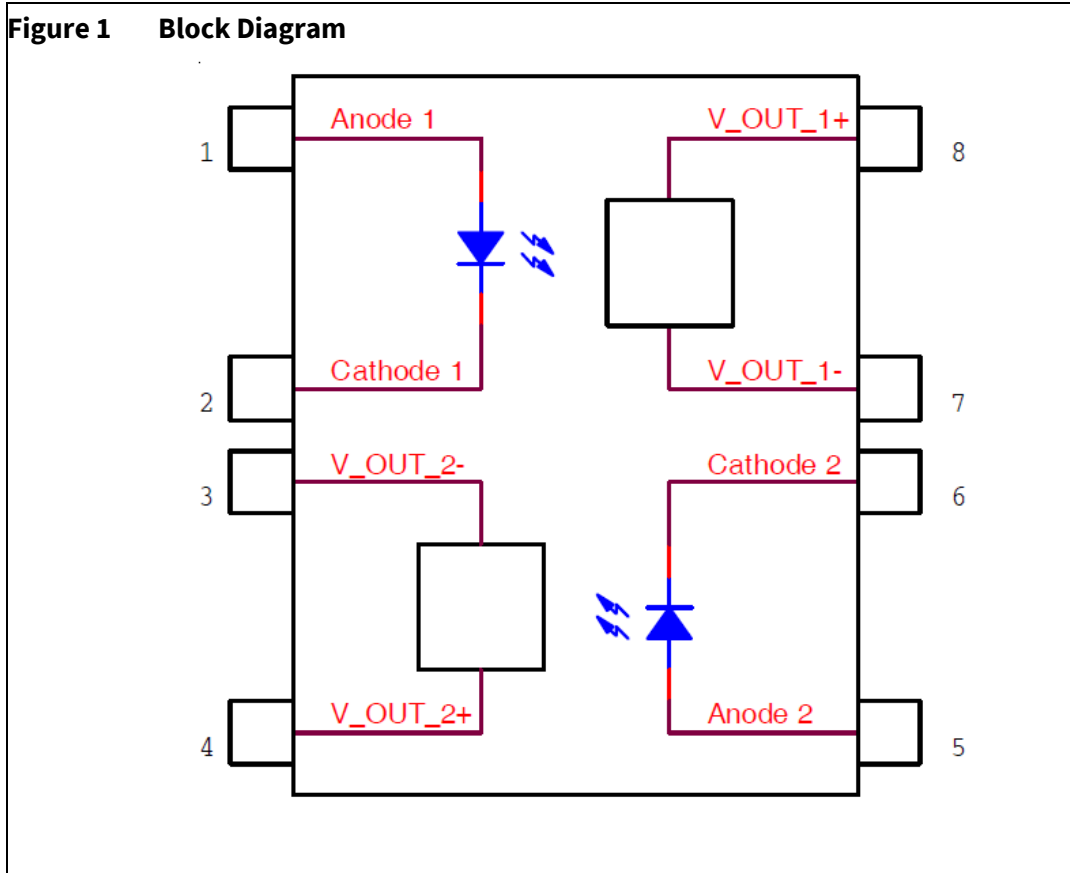

<sup>4</sup> Optically coupled Solid State Relays (SSRs) have relatively slow turn on and turn off times. Care must be taken to ensure that transient currents do not cause a violation of SOA. If transient conditions are present, IR HiRel recommends a complete simulation to be performed by the end user to ensure compliance with SOA requirements as specified in the IRHQ57110 datasheet.

<sup>5</sup> Rise and fall time are controlled internally.

<sup>6</sup> Specification is guaranteed by design.
