

Sensor Evaluation Software

SES2G Download Guide

Thank you for your interest in the Infineon XENSIV™ MEMS microphone audio hub evaluation board.

Before you can carry out evaluation of the XENSIV™ MEMS microphones, it is necessary to download the supporting software from MyInfineon. The following instructions detail how to create a MyInfineon account and download the software.

Additionally you can download on MyInfineon the Software Installation Guide and a Software User Guide with a detailed description how to use Infineon XENSIV™ MEMS microphone audio hub evaluation board. Both of these documents can be found in the option **Sensor Evaluation Software >> Documentation**.

1. For a new account please click on 'Not a user yet?' on the [MyInfineon login page](#).
On the 'Personal Information' tab you need to specify your personal details.
Mandatory fields are:
First Name, Last Name, Company, E-Mail, Phone Number and Address.
Please select Industry option "Consumer".
Further information is optional.
2. Once you have created an account, you will need to be granted access to the Sensor evaluation software. Please forward your MyInfineon username to your local Infineon Application Engineer to grant you access.
3. After access to the evaluation software download has been granted, you can log into your MyInfineon account and see a new section of the page, called: "Document Library: Pressure Sensor."
4. Please choose the options:
 - a. **Sensor Evaluation Software >> Software Download**To download the Sensor evaluation software installer, including the required Sensor Hub SES2G software drivers.
5. For detailed software installation instructions please refer to the Software Installation Guide.
For detailed software use instructions please refer to the Software User Guide.
Both of these documents can be found in the option **Sensor Evaluation Software >> Documentation**.
