

The following document contains information on Cypress products. Although the document is marked with the name "Spansion", the company that originally developed the specification, Cypress will continue to offer these products to new and existing customers.

Continuity of Specifications

There is no change to this document as a result of offering the device as a Cypress product. Any changes that have been made are the result of normal document improvements and are noted in the document history page, where supported. Future revisions will occur when appropriate, and changes will be noted in a document history page.

Continuity of Ordering Part Numbers

Cypress continues to support existing part numbers. To order these products, please use only the Ordering Part Numbers listed in this document.

For More Information

Please contact your local sales office for additional information about Cypress products and solutions.

About Cypress

Cypress (NASDAQ: CY) delivers high-performance, high-quality solutions at the heart of today's most advanced embedded systems, from automotive, industrial and networking platforms to highly interactive consumer and mobile devices. With a broad, differentiated product portfolio that includes NOR flash memories, F-RAM™ and SRAM, Traveo™ microcontrollers, the industry's only PSoC® programmable system-on-chip solutions, analog and PMIC Power Management ICs, CapSense® capacitive touch-sensing controllers, and Wireless BLE Bluetooth® Low-Energy and USB connectivity solutions, Cypress is committed to providing its customers worldwide with consistent innovation, best-in-class support and exceptional system value.

Preface

Objective of this supplementary Information

This document includes supplementary information with MB91590 HARDWARE MANUAL. When you need to set up EPFR53 and EPFR54 of Extended Port Function Register in order to use HSSPI, see this documentation as CHAPTER 4.13.18 on HARDWARE MANUAL.

Object document

Document name: FR81S 32-BIT MICROCONTROLLER MB91590 Series HARDWARE MANUAL

Document code: MN705-00009-5v0-E

4.13.18. Extended Port Function Register 53, 54 : EPFR53, EPFR54 (Extended Port Function Register 53, 54)

The bit configuration of extended port function register 53, 54 is shown below.

This register is used to set enable/disable for the HSSPI function.

■ EPFR53 : Address 0E95_H (Access : Byte, Half-word, Word)

	bit7	bit6	bit5	bit4	bit3	bit2	bit1	bit0
	Reserved			QUADSCKE	QUADSDE3	QUADSDE2	QUADSDE1	QUADSDE0
Initial value	1	1	1	0	0	0	0	0
Attribute ^{*1}	R1,WX	R1,WX	R1,WX	R0,W0	R0,W0	R0,W0	R0,W0	R0,W0
Attribute ^{*2}	R1,WX	R1,WX	R1,WX	R/W	R/W	R/W	R/W	R/W

[bit4] QUADSCKE: HSSPI clock enable

[bit3] QUADSDE3: HSSPI data enable

[bit2] QUADSDE2: HSSPI data enable

[bit1] QUADSDE1: HSSPI data enable

[bit0] QUADSDE0: HSSPI data enable

*1: MB91F591/2/4/6//9

*2: MB91F59A/B

QUADSDEn, QUADSCKE	Operation
0	Disable output
1	Enable output

n: channel number

■ EPFR54 : Address 0E96_H (Access : Byte, Half-word, Word)

	bit7	bit6	bit5	bit4	bit3	bit2	bit1	bit0
	Reserved				QUADSSELE3	QUADSSELE2	QUADSSELE1	QUADSSELE0
Initial value	1	1	1	1	0	0	0	0
Attribute ^{*1}	R1,WX	R1,WX	R1,WX	R1,WX	R0,W0	R0,W0	R0,W0	R0,W0
Attribute ^{*2}	R1,WX	R1,WX	R1,WX	R1,WX	R/W	R/W	R/W	R/W

[bit3] QUADSSELE3: HSSPI Slave select output enable 3

[bit2] QUADSSELE2: HSSPI Slave select output enable 2

[bit1] QUADSSELE1: HSSPI Slave select output enable 1

[bit0] QUADSSELE0: HSSPI Slave select output enable 0

*1: MB91F591/2/4/6//9

*2: MB91F59A/B

QUADSSELEn	Operation
0	Disable output
1	Enable output

n: channel number

Colophon

The products described in this document are designed, developed and manufactured as contemplated for general use, including without limitation, ordinary industrial use, general office use, personal use, and household use, but are not designed, developed and manufactured as contemplated (1) for any use that includes fatal risks or dangers that, unless extremely high safety is secured, could have a serious effect to the public, and could lead directly to death, personal injury, severe physical damage or other loss (i.e., nuclear reaction control in nuclear facility, aircraft flight control, air traffic control, mass transport control, medical life support system, missile launch control in weapon system), or (2) for any use where chance of failure is intolerable (i.e., submersible repeater and artificial satellite). Please note that Spansion will not be liable to you and/or any third party for any claims or damages arising in connection with above-mentioned uses of the products. Any semiconductor devices have an inherent chance of failure. You must protect against injury, damage or loss from such failures by incorporating safety design measures into your facility and equipment such as redundancy, fire protection, and prevention of over-current levels and other abnormal operating conditions. If any products described in this document represent goods or technologies subject to certain restrictions on export under the Foreign Exchange and Foreign Trade Law of Japan, the US Export Administration Regulations or the applicable laws of any other country, the prior authorization by the respective government entity will be required for export of those products.

Trademarks and Notice

The contents of this document are subject to change without notice. This document may contain information on a Spansion product under development by Spansion. Spansion reserves the right to change or discontinue work on any product without notice. The information in this document is provided as is without warranty or guarantee of any kind as to its accuracy, completeness, operability, fitness for particular purpose, merchantability, non-infringement of third-party rights, or any other warranty, express, implied, or statutory. Spansion assumes no liability for any damages of any kind arising out of the use of the information in this document.
