

Use cases:

Blockchain Security 2Go Starter kit

Pierre Rouillac (IFAG DSS SCS)

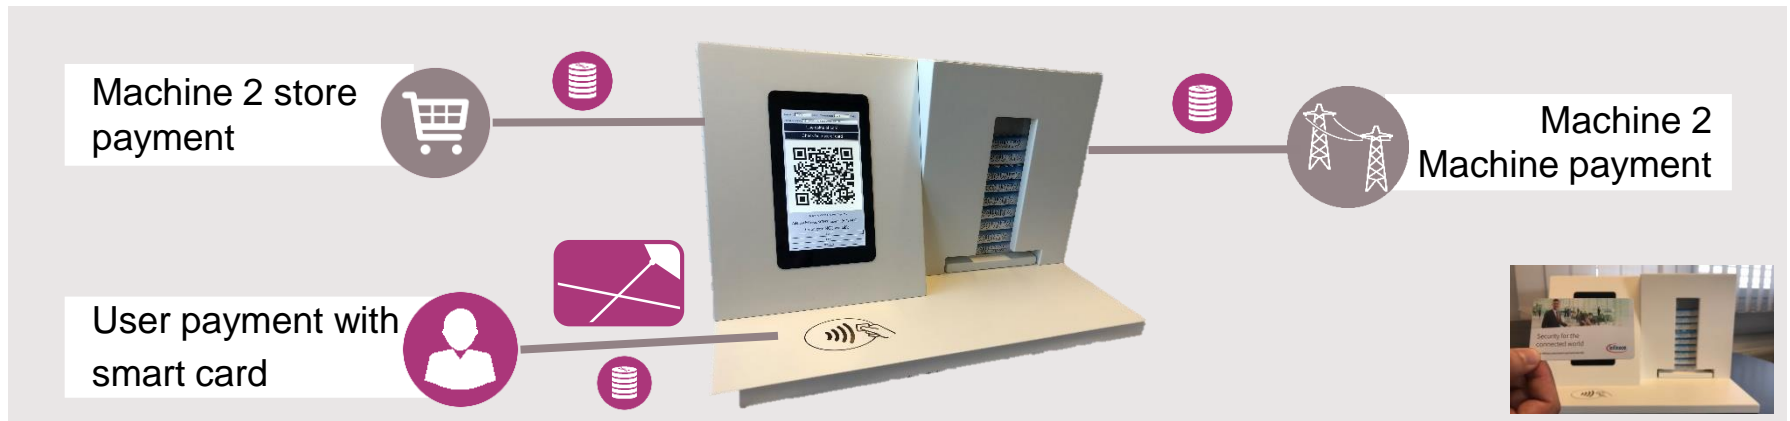

Numerous potential use cases

Payment without a trusted third party

Vending machine

Advantages of Blockchain

- ✓ No 3rd party required (e.g. bank)
- ✓ The machine itself “owns” money

Advantages of the starter kit

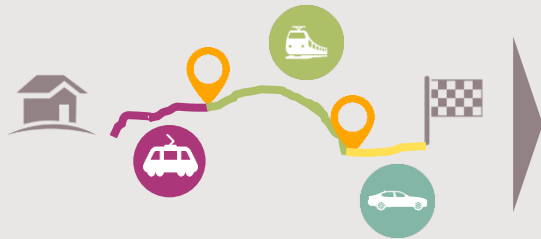

- ✓ Anonymity: the card holds the money, no person
- ✓ Offline transactions like cash: giving the card to another person

Collaborative ticketing for different parties

Transportation ticket from A to B

One ticket for
all services

Advantages of Blockchain

- ✓ No 3rd party required for collaboration btw different parties
- ✓ Usage of an existing infrastructure
- ✓ “Programmable ticket” via smart contract e.g. automatically get back money on delays

Advantages of the starter kit

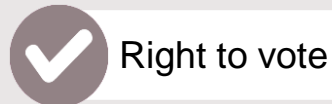

- ✓ Security: Prevention of cloning tickets
- ✓ Passive:
In contrast to smartphone tickets no external power is needed
- ✓ Compliant with existing infrastructures (e.g. tickets)

eVoting

Guessing game

Advantages of Blockchain

- ✓ No central authority
- ✓ Transparent: proof that the vote is counted
- ✓ Smart contracts: price can be automatically transferred

Advantages of the starter kit

- ✓ Anonymity: no registration needed
- ✓ Easy infrastructure setup
- ✓ Security

Part of your life. Part of tomorrow.
