Our non-GAAP operating income increased to 8.2% of revenue in the fourth quarter and we increased our cash balance by \$67.7 million.”

The Company excludes any tax provisions (benefits) that are not directly related to ongoing operations and which are either isolated or cannot be expected to occur again with any regularity or predictability.

*We provide non-GAAP net income and non-GAAP net income per share amounts in order to provide meaningful supplemental information regarding our operational performance. These supplemental measures exclude, among other things, accelerated depreciation, inventory write-offs related to fab closures, severance, impairment of goodwill, charges related to the amortization of acquisition-related intangible assets, the impact of asset impairment, restructuring and other charges. We also exclude tax provisions (benefits) that are not directly related to ongoing operations and which are either isolated or cannot be expected to occur again with any regularity or predictability in addition to tax adjustments related to non-GAAP operating income (loss) adjustments.*

*We use non-GAAP measures to evaluate the performance of our core businesses and to estimate future core performance. Since we find these measures to be useful, we believe that investors will benefit from seeing non-GAAP measures in addition to seeing*

---

*our GAAP results. This information facilitates our internal comparisons to our historical operating results as well as to the operating results of our competitors.*

*Our management recognizes that items such as amortization of intangibles and asset impairment, restructuring and other charges can have a material impact on our cash flows and/or our net income. Our GAAP financial statements including our statement of cash flows portray those effects. Although we believe it is useful for investors to see core performance free of non-GAAP adjustments, investors should understand that the excluded items can be expenses and charges that impact the Company's total cash balance. To gain a complete picture of all effects on the Company's profit and loss from any and all events, management does (and investors should) consider only the GAAP income statement and the other financial measures. The non-GAAP numbers focus instead upon the core business of the Company, which is only a subset, albeit an important one, of the Company's performance, and should not be relied upon by investors.*

*Readers are reminded that non-GAAP numbers are merely a supplement to, and not a replacement for, GAAP financial measures. They should be read in conjunction with the GAAP financial measures. It should be noted as well that our non-GAAP information may be different (and contain different inclusions and exclusions as compared to GAAP information) from the non-GAAP information provided by other companies and therefore are not being provided for the purpose of comparisons with other companies.*
