

Press Release

Alexandra Wachschrütz takes over as Head of Corporate Communications at Infineon Austria

Villach, 4 April 2023 - Alexandra Wachschrütz (46) has taken over as Head of Communications and Public Policy at Infineon Austria as of April 1. She succeeds Alexander Tarzi, who is taking on a new professional challenge in the energy industry.

Alexandra Wachschrütz has already been responsible for public relations, stakeholder communications and event management at Infineon Austria for around eight years. In recent years, her focus has increasingly been on strategic communications management for Infineon's expansion projects at all Austrian sites, in particular the expansion of production in Villach and the development centers in Graz and Linz.

Sabine Herlitschka, CEO of Infineon Austria: "Decarbonization and digitalization are the central topics that Infineon addresses with its products and system solutions. With Alexander Tarzi we have communicated these focus topics very effectively in recent years, for which I would like to thank him and wish him all the best in his new role. At the same time, I am delighted that Alexandra Wachschrütz, a proven communications expert from within the company, is taking on this management position. Thanks to her extensive knowledge of the industry and her experience, she is ideally placed to communicate the great importance of these future fields with her team in a way that is tailored to the target group, and thus to get people excited about Infineon."

From her time before Infineon, Alexandra Wachschrütz brings many years of communications experience from the agency sector (including ECC PUBLICO) to a management position in the marketing department of Volksbank GHB Kärnten.

About Infineon Austria

Infineon Technologies Austria AG is a group subsidiary of Infineon Technologies AG, a world-leading provider of semiconductor solutions that make life easier, safer and greener. Microelectronics from Infineon reduce the energy consumption

of consumer electronics, domestic appliances and industrial facilities. They make a major contribution to the convenience, security and sustainability of vehicles, and enable secure transactions in the Internet of Things.

Infineon Austria pools competencies for research and development, production as well as global business responsibility. The head office is in Villach with further branches in Graz, Klagenfurt, Linz and Vienna. With 5,461 employees from 79 countries (including 2,390 in research and development), in the fiscal year 2022 (ending in September) the company achieved a turnover of € 5,2 billion. With a research expenditure of 585 million euros, Infineon Austria is one of the strongest research companies in Austria.
