

Errata Sheet

June 1, 1999 / Release 1.1

Device:	C517A-L
Stepping Code / Marking:	AA
Package:	P-LCC-84, P-MQFP-100

This Errata Sheet describes the deviations from the current user documentation. The classification and numbering system is module oriented in a continual ascending sequence over several derivatives, as well already solved deviations are included. So gaps inside this enumeration could occur.

The current documentation is: Data Sheet 10.97
User's Manual 01.99
Instruction Set Manual 05.98

Note: *Devices marked with EES- or ES are engineering samples which may not be completely tested in all functional and electrical characteristics, therefore they should be used for evaluation only.*

The specific test conditions for EES and ES are documented in a separate Status Sheet.

Change summary to last Errata Sheet Rel. 1.0:

- **New User's Manual** (01.99) does not contain incorrect information about "wakeup from software power down" anymore.

Functional Problems:

None.

Deviation from Electrical- and Timing Specification:

None.
